

pH Test Strip Activity

1. Dip Test Strip in water
2. Wait 15 seconds (or follow instructions on package)
3. Compare colour to scale below or on package
4. Write down your answers if you are testing different samples and compare them.
5. Think of why the pH levels might be different in water samples from different locations?

pH levels in watercourses throughout the Otonabee Region Watershed are generally between 6.5 and 8.5
